<u>Global Export</u>

1. Headline :

How It Works — From Japan to Your Port

2. Short explanation :

We handle the complete vehicle export process from Japan — from sourcing and purchase through to international shipment.

Each stage is structured and executed with clarity, transparency, and full control, ensuring a consistent and reliable process from initial request to final delivery.

3. Trust strip (BLOCKS) :

120+ Auction Houses *Direct Auction Access* *End-to-End Export Handling*

4. Visual : an appropriate picture will be added in the background

5. Transition to steps :

The full process is outlined below.

1 — Vehicle Request

The process begins with your vehicle request, based on your specific requirements. (backlinked to the request a vehicle page)

(You can also show an illustration of the vehicle request form too)

You can specify:

- Make
- Model
- Year range
- Mileage
- Transmission
- Color
- Destination country
- Grade
- Budget range

For example, you may request a 2021 Toyota Prius within a specific mileage range and condition grade.

The more precise your request, the more accurately we can identify suitable vehicles.Once your requirements are clear, we move directly into sourcing across the Japanese market.

2 — Auction Search

With access to 140+ auction houses across Japan, we source vehicles directly from the market based on your requirements.

- Real-time sourcing from auctions
- Additional access through dealer and private networks

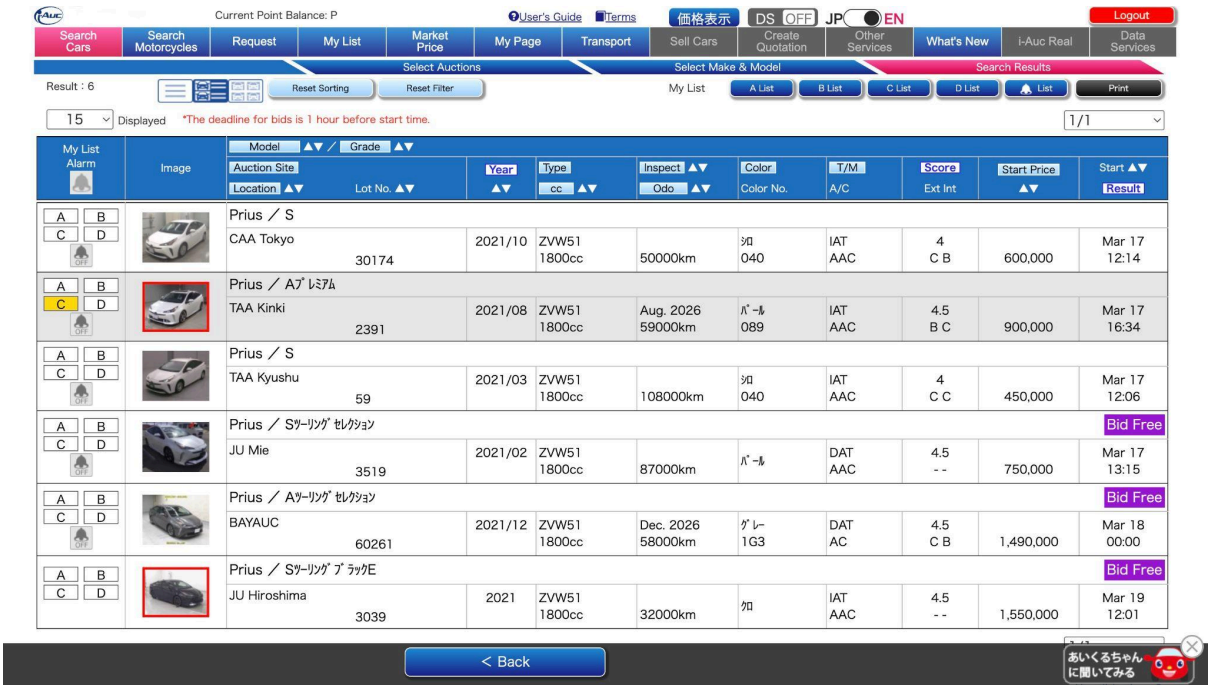
3 — Vehicle Selection

We carefully shortlist vehicles that match your exact requirements, ensuring only verified and suitable options are presented for your review.

From a selection of suitable vehicles based on your request, you make the final selection based on condition, mileage, and price, supported by ***detailed photos*** *and* ***auction sheets*** *for confirmation.*



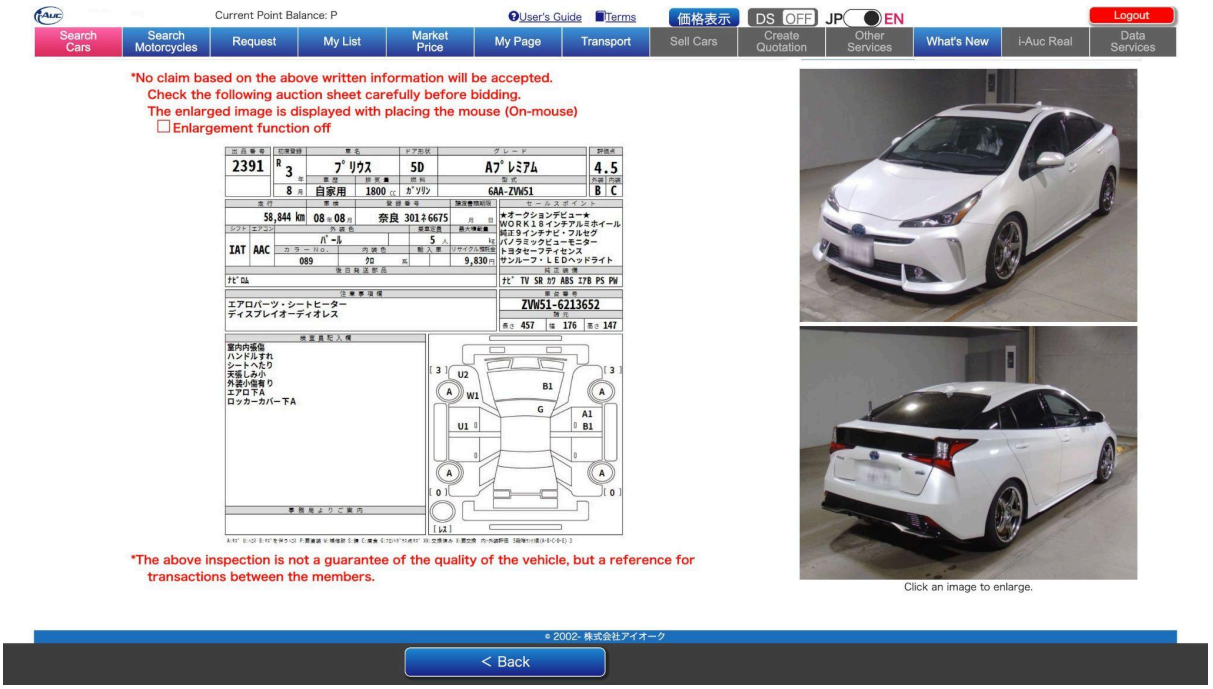
4 — Auction Sheet Review

Each vehicle comes with an official inspection report called an **auction sheet**. (backlinked to the info page “**auction sheet**” section)

This report includes:

- Overall condition grade
- Verified mileage
- Exterior damage markings
- Interior condition notes
- Inspector remarks

We review the auction sheet, provide clear translations, and offer professional guidance so you fully understand the vehicle’s condition before confirming your purchase.



5 — Price Confirmation & Deposit

Once you confirm your selected vehicle:

- A **maximum bid(backlink)** is agreed based on current market conditions
- A deposit is required to proceed with auction participation
- KMT Global prepares the purchase agreement and invoice
- The remaining balance is payable only if the vehicle is successfully secured

To proceed, a deposit is required:

- ***Under JPY 1,000,000 → Deposit JPY 100,000***
- ***JPY 1,000,000 or more → Deposit 10% of the current market price***

Your deposit is applied strictly toward your approved vehicle purchase, and no action is taken without your confirmation.

6 — Auction Bidding (backlinked to info page)

Once your deposit is confirmed, we proceed with auction bidding on your behalf through Japan's auction network.

All bids are conducted strictly within your pre-approved maximum, ensuring full alignment with your budget.

- **Successful bid:** The vehicle is secured, and the process moves forward
- **Unsuccessful bid:** Sourcing continues, with participation in upcoming auctions until a suitable vehicle is secured

You remain fully informed throughout the bidding process.

7 — Final Payment

Once your vehicle is successfully secured, a final invoice is issued covering:

- **Auction invoice price** — exact amount paid at auction
- **Service fee** *(backlinked to the info page "service fee" section)*
- **Domestic transport within Japan**, depending on the auction location

The official auction invoice is shared for verification, reflecting the confirmed purchase amount without adjustment.

To ensure smooth processing and avoid delays, payment is required within 3 working days after invoice issuance.Once payment is confirmed, the vehicle proceeds to export preparation and shipping arrangements.

8 — Export Preparation

Once the vehicle is secured and payment is confirmed, export preparation begins.

This includes:

- Vehicle deregistration in Japan
- Export certificate issuance
- Documentation preparation
- Inland transport to the designated shipping port

All documentation is prepared in line with export regulations, ensuring a smooth transition to shipment.

Sample Export Certificate (details partially hidden for privacy)

9 — Shipping & Delivery

Once the vehicle is ready, international shipment is arranged to your destination.

Depending on your preference and destination, vehicles are shipped via:

- RoRo (Roll-on / Roll-off) *(learn more)*
- Container shipping *(learn more)*

Shipping schedules are coordinated based on the destination port and vessel availability.

*All required documentation is prepared and provided in advance, including the **Bill of Lading** and **Export Certificate**, ensuring a smooth customs clearance process at the destination.*

Upon arrival at the destination port, you proceed with local import procedures and vehicle clearance in accordance with your country's regulations.

End-to-End Support

From initial request through to final delivery, each stage of the process is managed with clarity and control.

- Clear communication at every step
- No action taken without your approval
- Strict alignment with your requirements and budget
- Full visibility from sourcing to shipment

The entire process remains structured, transparent, and consistent throughout.
